

PRESS RELEASE

Vogelsang: Successful financial year with product innovations

- **Increased sales domestically and abroad**
- **Product range expanded to include separation technologies and other new additions**

Essen (Oldenburg), March 29, 2022 – [Vogelsang GmbH & Co. KG](#) has reported annual turnover in 2021 of 145 million euros for the Vogelsang Group (Vogelsang Germany and its subsidiaries). This represents an eight-percent rise in sales compared to the previous year. Despite the continued difficult conditions resulting from the Corona pandemic, the company has been able to increase its sales both at home and abroad – driven primarily by the segments of agricultural technology, biogas, and industry. “Product innovations and the further development of our machines and components are driving us forward. Yet more important, though, is that we maintain a direct exchange with our customers and partners and remain in close contact with them. Consequently, we were pleased to present our innovations and further developments at our in-house events as well as in webinars featuring live product demonstrations,” says Harald Vogelsang, CEO of Vogelsang GmbH & Co. KG.

Portfolio expanded further

Milestones from the last year include the introduction of new and further developed products: One of these is the XSplit press screw separator, the first separator Vogelsang has launched for the processing of slurry and digestate. Also new are the precision distributor ExaCut ECC without air suction and the ProCap T progressive cavity pump, as well as the PowerFill Small compact filling aid and the Flow Performance Monitor (FPM). In addition, the UniSpread universal linkage is now also available with a working width of 10.5 m, while the BlackBird trailing shoe linkage in working widths of 21 and 24 m is equipped with a simplified control system. Vogelsang has also further developed the SyreN system for liquid manure acidification in terms of both appearance and safety.

Digital customer experiences still a key focus

Over the last few years, Vogelsang has dedicated itself largely to the issue of digitalization and its digital offering has been expanded to include further virtual 360-degree showrooms. This way, those who are interested in the segments of [wastewater](#),

[agricultural technology](#), and [biogas](#) can find information on the Vogelsang product range that functions interactively. This year, the company is planning a further two showrooms in the areas of industry and transportation.

Harald Vogelsang: "We are delighted to support our customers in their work with our technology and advice. To do so, we are continuing to invest in the areas of research and development, production, and in the digitalization of marketing and sales."

About Vogelsang:

Vogelsang GmbH & Co. KG, headquartered in Essen (Oldenburg) in Lower Saxony, develops, produces and sells technically high-quality, individually configurable and service-friendly machines. Founded in 1929, the company grew from a manufacturer of agricultural machinery into a specialist in machines and solutions in the wastewater, agricultural technology, biogas, industrial and transportation technology segments. The innovative family company currently employs over 1,200 people worldwide. As an internationally oriented mechanical engineering group, the company ensures the highest product quality through research, development, and production at the Essen location and in other production facilities in Germany and abroad. Thanks to a continuously growing network of subsidiaries and sales offices, Vogelsang is present with over 50 locations around the world. The company has already received several awards from the economic research institute Prognos AG, among other things as "Germany's innovation leader".
